EDUCATION

Indian Institute of Information Technology, Tiruchirappalli
B.Tech – Electronics and Communication Engineering

Aug 2023 – Apr 2027
CGPA: 8.5 / 10

EXPERIENCE

Software Developer Intern | Jungle (usestack.ai)

Nov 2025 – Jan 2026

- Engineered an AI-powered tool-recommendation **search pipeline**; validated across 15+ edge cases and 5 LLMs, cutting irrelevant results by 35%.
- Automated **SERP-scraping** and **AI metadata-extraction** pipeline, slashing tool-onboarding time by **60%** (5 min → 2 min per entry) to support faster catalog scaling.
- Designed **role-based access control (RBAC)** and an admin-approval workflow, cutting spam and low-quality submissions by 25%.
- Shipped and operated production backend services on **Next.js + PostgreSQL**, sustaining 100% uptime with zero downtime incidents.

PROJECTS

PulseIQ.AI | Next.js, React.js, MongoDB, Redis, Node.js, TypeScript, Google Gemini API

[Live](#) | [GitHub](#) • *Jul 2026*

- Developed PulseIQ.AI, an **AI-native observability** platform with a custom logging SDK for centralized log ingestion, real-time monitoring, and incident tracking.
- Cut incident investigation time by **~70%** using LLM-powered root cause analysis, automated incident summaries, and remediation suggestions.
- Architected a **scalable log pipeline** with MongoDB, Redis, and asynchronous processing, delivering high-throughput ingestion and subsecond dashboard queries.

Flagship | Next.js, PostgreSQL, NeonDB, Drizzle ORM, TanStack Query, Redis, Railway, BullMQ

[Live](#) | [GitHub](#) • *May 2026*

- Architected a **feature-flag platform** with **targeted rollouts**, **audit logging**, and versioned rollbacks, allowing safe production releases without redeployment.
- Reduced flag-evaluation latency to sub-100ms via **multi-layer caching** (Redis + SDK cache) and optimized database access patterns.
- Implemented an **event-driven analytics** system using **background workers** to aggregate feature-exposure and performance metrics for live observability.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, TanStack Query, REST APIs, HTML/CSS

Backend & Systems: Node.js, Express.js, Redis, Event-Driven Architecture, Background Workers, Caching Strategies

Databases: PostgreSQL, MongoDB, Supabase

Tools: AWS EC2, Git, GitHub, Postman, Vercel

CS Fundamentals: Data Structures & Algorithms, System Design, OOP, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

- LeetCode Knight:** Max Rating 2094, Top 1.5% Globally, 1000+ DSA problems solved.
- ICPC Asia West Regionalist (2025):** Qualified via regional rounds in one of the world's largest competitive programming contests.
- IICPC CodeFest 2026:** Ranked 1830 of 13,000+ participants in a multi-site offline contest.
- Codeforces Specialist | CodeChef 3-Star** (Max: 1677).
- Technocrats Hackathon Finalist:** Top 70 of 400+ teams.

LEADERSHIP & EXTRACURRICULARS

- Competitive Coding Club:** Mentored juniors on DSA, ran contest-prep sessions, and organized campus coding events.
- Table Tennis Club Coordinator:** Organized intra-college tournaments; managed scheduling and event logistics.
